EXECUTIVE B2B PARTNERSHIP BRIEF — DIAGNOSTIC ALLIANCES

Doorstep Phlebotomy & B2B Order Booking API Integration

70%
PATIENT TEST ATTRITION
7 in 10 patients with abnormal lab values fail to repeat follow-up blood tests without proactive tracking.

₹0 CAC
ZERO-ACQUISITION VOLUME
Aegis AI identifies clinical indications and drives high-intent doorstep bookings with zero ad spend for the lab.

90 / 180d
PREDICTABLE CADENCE
Automated longitudinal monitoring triggers for Diabetic (HbA1c: 90d) and Metabolic/Lipid (180d) cohorts.

CLOSED-LOOP PATIENT INGESTION & RETEST FLYWHEEL

1. **Multimodal Pathology OCR & Ingestion**
   Patients upload historical PDFs or camera scans; Gemini multimodal models extract 50+ biomarkers into normalized longitudinal trends.
2. **Clinical SBAR & Specialist Consensus**
   Generates structured physician briefs (Situation, Background, Assessment, Recommendation) grounded in ICMR, ADA, and ACC/AHA guidelines.
3. **Proactive Retest Recommendation**
   When abnormal biomarkers or elapsed monitoring milestones are flagged, Aegis recommends certified confirmatory panels.
4. **1-Click Doorstep Phlebotomy Dispatch**
   Orders are dispatched via B2B API to partner phlebotomists (Thyrocare / 1mg); verified results sync back automatically via webhook.

STRATEGIC VALUE FOR DIAGNOSTIC PARTNERS

- ✓ **High-Margin Preventive Volumes**
  Generates steady, recurring demand for full-body wellness and chronic screening packages.
- ✓ **Zero Technical Friction (Plug & Play)**
  Ready integration with Thyrocare TechSo, REST booking endpoints, and webhooks.
- ✓ **DPDP Act 2023 & NABL Alignment**
  Explicit patient consent, AES-256 data isolation, and verified NABL laboratory accreditation.
- ✓ **ABDM & FHIR R4 Ready**
  Structured lab observations convert to HL7 FHIR bundles for Ayushman Bharat Digital Mission.
